Looking for help? We also have some worked examples and links to our support page which will help you to nail this concept. Converting a decimal into a fraction is a fairly straightforward process. It involves looking at the number of decimal places the decimal has and putting the decimal part as the numerator and the denominator as a '1' followed the same number of zeros as there are decimal places. This converts the decimal into a decimal fraction (a fraction where the denominator is a power of 10. After that, you will probably need to simplify the fraction. Example 1) Convert 0.37 into a fraction. This decimal has two decimal places. So the numerator is the decimal number, which is 416. The denominator is a '1' followed by 3 zeros, which is 1000. This give us $\frac{416}{1000}$ \ Example 3) Convert 0.9 into a fraction. This decimal has 1 decimal places. So the numerator is the decimal number, which is 9. The denominator is a '1' followed by 1 zero, which is 10. This give us $\frac{9}{10}$ \ Take a look at our dedicated help page on how to convert a decimal into a fraction. This page has lots of worked examples and a video to watch! Convert Decimal to Fraction Support Here are our worksheets to help you practice converting decimals to fractions. The sheets within each section are graded with the easiest ones first. The harder sheets involve both converting the decimals and then simplifying the fractions. We also have separate sheets involving converting mixed decimals (with a value greater than 1) into fractions. These sheets are aimed at students in 5th and 6th grade. These sheets are similar to those in the section above, but involve mixed mixed decimals greater than one to convert. We have some fun fraction - decimal worksheets involving working your way through clues to solve a riddle. The riddles all involve converting between fractions and decimals. Take a look at some more of our worksheets similar to these. Take a look at our Simplifying Fractions Practice Zone or try our worksheets for finding the simplest form for a range of fractions. You can choose from proper fractions, improper fractions or both. You can print out your results or benchmark your scores against future achievements. Good for practising equivalent fractions as well as converting to simplest form. Great for using with a group of children as well as individually. Simplify Fractions Practice Zone Simplifying Fractions Worksheet page Are you looking for free fraction help or fraction support? Here you will find a range of fraction help on a variety of fraction topics, from simplest form to converting fractions. There are fraction videos, worked examples and practice fraction worksheets. The weblinks below contains more support, examples and practice converting between fractions, decimals and percents. How to Print or Save these sheets Need help with printing or saving? Follow these 3 easy steps to get your worksheets printed out perfectly! How to Print or Save these sheets Need help with printing or saving? Follow these 3 easy steps to get your worksheets printed out perfectly! The Math Salamanders hope you enjoy using these free printable Math worksheets and all our other Math games and resources. We welcome any comments about our site or worksheets on the Facebook comments box at the bottom of every page. Page 2 Welcome to our 2 Digit Multiplication Worksheets page. We have plenty of worksheets on this page to help you practice the skills of multiplying 2-digit numbers by 1 or 2 digits. We have split the worksheets on this page into two sections: 2-digit x 1-digit multiplication degree) 2 digits x 2 digits multiplication (4th grade) Each section ends with some more complicated challenging sheets for more capable students. Within each section, the leaves are carefully sorted with the easiest leaves first. These leaves are for 3rd classifiers. Leaves 1 to 4 consist of 15 problems; leaves 5 and 6 consist of 20 problems. Sheets 1 and 2 involve multiplying 2 digit numbers by 2, 3, 4 or 5. Sheets 3 to 6 involve multiplying a 2-digit number by unique digit numbers and finding more complicated growing products. These 2-digit multiplication worksheets are designed for more capable students who need this extra challenge! These leaves are for 4th classifiers. Sheet 1 involves the multiplication of 2 digits with smaller numbers and responds up to 1000. Sheets 2 to 4 have more difficult 2 digit numbers to multiply and responses that are usually greater than 1000. These 2-digit multiplication worksheets are designed for more capable students who need this extra challenge! We have more 2-digit multiplication worksheets, including 2-digit x 3-digit multiplication problems on this page. Double digit multiplication work sheets (harder) Take a look at some of our similar worksheets. Need to create your own long or short multiplication worksheets quickly and easily? Our worksheet generator Multiplication will allow you to create your own custom worksheets to print, complete with responses. Here you will find a variety of Multiplication worksheets to help you become more fluent and accurate with your tables. Using these leaves will help your child to: learn their multiplication tables up to 10 x 10; understand and use different multiplication models; solve a variety of multiplication problems.the free 3rd class math worksheets in this section are informed by Elementary Math Benchmarks for 3rd Grade. Here you will find a variety of Free Printed Multiplication Games to help children learn theirFacts. Using these games will help your child learn their multiplication facts to 5x5 or 10x10, as well as develop their memory skills and strategy thinking. Multiplication Mateman Games How to print or save these leaves need help with impression or economy? Follow these 3 Sneakers to get your spreadsheets printed perfectly! How to print or save these leaves need help with impression or economy? Follow these 3 Sneakers to get your spreadsheets printed perfectly! Mateman Salamanders expect you to enjoy using these free math spreadsheets and all our other mathematical games and features. We congratulate you with any comments about our website or spreadsheets in the Facebook comment box at the bottom of each p. page.
