You can never get bored of it. Crazy Craft is an insane Minecraft mod pack that increases the thrill in the game to another level. If you have heard of it and want to try it, this post is specially written for you. Here, I will guide you on how to download and install Crazy Craft 4.0 mod pack in Minecraft. For the newbies, I will also explain what this mod pack is all about, and why you must give it a shot at least once. What is Crazy Craft in Minecraft? Minecraft is a game that you can literally play for hours without getting bored. But what after hours? There comes a time when you'll feel the need to add some thrill to the gameplay. A Minecraft mod is designed to do that exactly. It adds new features and layers to the typical gameplay. A modpack (mod pack) is a collection of Minecraft mods that are designed and configured to work together. They usually revolve around a theme and make the game very exciting. Crazy Craft is a Minecraft modpack that makes Minecraft more challenging than ever. It features a randomizer to make everyone's game different, custom mods that allow you to choose your style, and tweaked mods to make the game special and very interesting. It is created by Voids Wrath, and currently on version 4.0. Why you must try Crazy Craft in Minecraft? Crazy Craft 4.0 is a must-try Mod Pack for Minecraft. If you are a Minecraft player, you are really missing out on a lot of things if you haven't tried it yet. It is re-imagined with creepers ranging from 100-300 health, all normal mobs booted heavily, and Stronger modded bosses. Not only this but you will also find a lot of custom items on your exploration like YouTuber hats, modded drops from mobs, and more. It will be truly a crazy experience. If you are bored of the usual Minecraft gameplay where you are just moving, building, and fighting, then you should quit it and start playing the game with this incredible Modpack. How to Download & Install Crazy Craft in Minecraft? Since Crazy Craft is a Minecraft modpack, you will have to download, install, and activate it manually. Here is a step-wise guide that you can use to install it on your device. just follow the simple steps mentioned here and you'll be running Crazy Craft 4.0 on Minecraft. Step-1: Download the VoidLauncher VoidLauncher is a Minecraft mod pack launcher that allows you to run several modpacks. Some popular modpacks that you can enjoy with this launcher include Jurassic Craft 2, Dream Craft 2, Pokepack, Voids Wrath, etc. Crazy Craft 4.0 also runs through it. Download VoidLauncher for PC Click on the download button above to download VoidLauncher on your PC. On the download page, scroll to the bottom, and click on the 'Download for Windows' option. If you are using a Mac or Linux system, you will have to click the 'Cross-Platform Download' button. Step-2: Decompress the VoidLauncher Folder When you download VoidLauncher, it will be in a ZIP file format. You have to decompress or unzip it before using it. Just double-click on the file, and extract its components to the folder of your choice. When the files are unzipped, you are ready to use the launcher. Step-3: Launch the VoidLauncher After unzipping it, launch the VoidLauncher. To do that, double-click on the file that you have moved to the desktop. When the launcher runs, it will ask you to install some updates initially. Follow the on-screen instructions to install updates, and then the launcher will restart. The next step is to log in to the VoidLauncher. Just enter your Minecraft username and password in the given boxes, and check the 'Remember me' box. You don't need to click anywhere after entering the details. Simply enter them and leave them. If you don't have a Minecraft account, you can't install and run Crazy Craft. To use it, you must own a copy of Minecraft. You can get it from Minecraft.net. Step-5: Download & Install Crazy Craft 4.0 The next step is to download and install Crazy Craft 4.0 via VoidLauncher. To do that, click on the "MOD PACK" button present right next to the "HOME" button. Both of them are located on the top-left section of the screen. Next, scroll through the list of Mod Packs, find Crazy Craft 4.0, and click on it. You will then see the description of the modpack. Just scroll down, and click on the "PLAY" button present in the center. After that, the Mod Pack will start downloading. It may take some time to download depending upon the speed of your internet connection. Step-6: Enjoy Playing Crazy Craft 4.0 Once done, you can start playing it. You can start a world for a single player, or join a server. You can do whatever you wish. There are so many things that you can do with this crazy Minecraft mod pack. That's it. This is how you install Crazy Craft 4.0 on Minecraft with VoidLauncher. An Alternative to Crazy Craft 4.0: Kinda Crazy Craft 2.0 If you have played Crazy Craft and now want something new, we have a crazier alternative to it. Kinda Crazy Craft 2.0 is a Minecraft mod pack that features a very long list of mods from various genres. You will find technical mods, farming mods, magical mods, building mods, and varying mobs. It takes the level of adventure and exploring to a whole different level. It is one of the most challenging Minecraft mod packs of all time. You will have to defeat the biggest and the most feared mob while exploring the Twilight Forest. This mod pack currently has 149 Mods to improve the gameplay and intensify your experience. Final Words Crazy Craft 4.0 is an incredible Minecraft mod pack that makes the game very challenging and interesting. This is how you can download and install it with the help of VoidLauncher. Now you also know about an alternative to this mod pack, Kinda Crazy Craft 2.0. You can have fun with both of these and enjoy the experience. That's it from our side. I hope you are enjoying these modpacks. Don't forget to share your experiences using the comment box. In this guide, we're going to show you how you can download, install and start playing the Crazy Craft 4.0 Modpack for Minecraft. This guide will consist of using the VoidLauncher, as it will allow you to download the pack within a few clicks.Crazy Craft 4.0 has always been a popular modpack, with it containing a lot of interesting mods. In total, it adds around 73 mods, and uses Minecraft 1.7.10 as a base version. This guide should be easy enough to understand for beginners. We've covered many more installation guides for Minecraft Modpacks here at PwrDown! Alternatively, you might want to check out some of our lists of the best Minecraft Mods Installation Guide:To install Crazy Craft 4.0, do the following:install the VoidLauncher ApplicationExtract the Launcher to your Desktop, and then open it.With the Launcher open, log-in to your Minecraft Profile in the bottom left corner of the window.Select Crazy Craft 4.0 from the modpacks list, then select 'Play' to install it.Once Crazy Craft 4.0 has finished installing, the modpack will be open and ready to be played.Alternatively, you can follow the steps below for some more detailed instructions with images:Step 1: Download VoidLauncherThe first thing you will need to do is install VoidLauncher, as that's where the modpack is downloaded from. The VoidLauncher is like most other launchers, offering a simple place to download and install Modpacks. Some of the most popular packs that the VoidLauncher offers are Crazy Craft, JurassicCraft and many more. Download the VoidLauncherHead to the page, and scroll down to find the download links. There is a Windows option, as well as a Cross Platform option which is for users who are on platforms such as Mac OS and Linux. When you download the VoidLauncher, it will be inside of a ZIP file. By default, your computer should already be capable of opening this file. Though if it isn't, you might want to download some third party software such as 7-Zip or WinRAR. The ZIP File with VoidLauncher insideInside the ZIP file is an EXE named 'VoidLauncher.exe'. As this is the actual launcher, you need to move it to an appropriate location where you can easily access it. The Desktop is a good choice. Simply drag it out of the ZIP folder, or right click the file and choose 'Extract'. READ: Top 10 Best Minecraft Seeds for 1.14 in November 2018Once you have moved the EXE file out of the ZIP folder, you can go ahead and open it. When you do so, a few files might need to download, and the VoidLauncher will update itself if necessary. Anytime you want to open the launcher in the future, just open this same file.The VoidLauncher Home ScreenWith the Launcher open, we need to login. Your credentials are safe inside the VoidLauncher, and are required to install modpacks as you need a legitimate Minecraft account. You also won't be able to connect to multiplayer servers without logging in.In the bottom left corner of the screen, enter your Minecraft details and press the 'Log-in' button. Now we can install Crazy Craft Step 4: Download & Install Crazy Craft 4.0You're now ready to start installing Minecraft Modpacks. On the left hand side of the VoidLauncher, you should see a list of modpacks. If you don't, make sure you have clicked the 'Mod Pack' button at the top of the screen. Scroll down a bit until you spot Crazy Craft 4.0, it should be around seventh in the list of modpacks. Select it, and you can then press the 'Play' button to start downloading and installing the pack. Install Crazy Craft 4.0Now we just have to wait for the pack to install. This might take a while, and it depends a lot on your own internet speeds. There are a lot of mods and configuration files which need to be downloaded, so be patient.When you select a pack, you can see a lot of information about it. This includes the version that the modpack uses (which is 1.7.10 in Crazy Crafts case), as well as all the mods that are included. In the advanced section, you can make backups, install maps and more. Step 5: Play Crazy Craft 4.0That should hopefully be it! If you didn't run into any errors, Minecraft will be open, except with all the mods and configuration files loaded. You're now ready to play Crazy Craft 4.0.Just like Vanilla Minecraft, you can go ahead and start up a single player world, or just a multiplayer server if you know any. Anytime you want to play Crazy Craft 4.0 in the future, just follow these steps again (open the VoidLauncher, select Crazy Craft 4.0 and hit the play button). Question asked by Guest on Aug 20th 2019Can I get crazy craft on Xbox 360? If so how The Crazy Craft Mod Pack is crazier than ever! This modpack focuses around insane mobs, quests, magic, and construction, and automation! The craziness has only begun boys and girls. This is minecraft re-imagined with over 300 new blocks, 200 custom mobs, and 80 new food, and who can forget the weapons there is a total of 60 new ones beyond belief. Stronger modded bosses! Your simple diamonds are just not enough in this mod pack! think again. It does not end take part of this crazy adventure and get ready to admit defeat! Your faces will be melted. After 5 years Crazy Craft 4.0 is finally getting released! I never thought I would update Crazy Craft 3.0, but here I am releasing one of the greatest mod packs we have ever created. This mod pack focuses on taking your minecraft knowledge and throwing it out the window. THIS IS CRAZY CRAFT 4.0 BABYYY...okay enough hype. This pack brings some of the greatest mods from 1.7.10 and with our custom randomizer mod it changes the adventure for everyone. No one player will have the same Crazy Craft 4.0 experience. We realize not everyone wants to have a scrambled recipe world. For them we have created a new world option when creating a world. You will simply turn off scrambled recipes which is located right under naming your new world. For server owners that want normal recipes there is a settings.dat file that you can edit and change to true. This will make all recipes default for your players. In the future we are adding a command that can change recipes server wide without restarting. We are also working on a command that can change recipes for a single player on the server. We get everyone has a different play style and this will help everyone create the adventure they want. The most notable mods included in Crazy Craft 4.0 are Orespawn, Legends mod, TragicMC, witchery, HBM nuclear tech, Mchell and many more. We wanted to include many of the old mods you loved and obviously the biggest one was orespawn. We did however want to create a new experience and that meant new mods and the recipe scramble mod. The recipe scramble mod does not just randomize recipes, it will take all of minecraft and change every aspect. You can get random items from leaf decay, mob drops, breaking melons/glowstone, arrows are randomized, hoppers give random items, etc etc etc. We did hear fans express that randomized recipes was not their thing and we heard you loud and clear. We created a world gen option right on the world creation page to turn off random recipes. We recommend learning about the Tragic MC mod here, the HBM nuke tech mod here, legends mod here, and orespawn mod here. Good luck in your adventure and if you find bugs please report them HERE or on our Discord. You will receive no help on my youtube channel comments as there are way too many of them. Anyways happy crafting! Please alert us of any reploading of our mod pack to any launcher outside the void launcher. This includes Technic, curseforge and others. We do not want players get wrong versions of the pack and us being unable to help them. Frequently asked Questions: Click hereQuestion: How do I reset recipes on my world?Answer: delete the recipes.cfg in your world folderQuestion: How do I turn recipes to normal on a server? Answer: Open settings.dat file in your world folder and change it from true to falseQuestion: I have a bug how do I report it?Answer: Upload your log or crash report to pastebin and post it in the comments or join our discord discord.gg/atlanticcraftQuestion: I am lagging how can I make my game go faster?Answer: download optifine for 1.7.10 and add it to your mod pack by selecting crazy craft 4 on the launcher and hitting the advanced button to find the mods folder. Then add optifineQuestion: How do I disable all the random features from recipe scramble?Answer: edit the recipescramble.cfg file located in your config folder
