6 TIMES TABLE SHEET 1 ANSWERS

- |                                       |                                       |
|---------------------------------------|---------------------------------------|
| 1) $6 \times 0 = 0$                   | 21) $6 \times 3 = 18$                 |
| 2) $2 \times 6 = 12$                  | 22) $1 \times 6 = 6$                  |
| 3) $4 \times 6 = 24$                  | 23) $6 \times 5 = 30$                 |
| 4) $6 \times 11 = 66$                 | 24) $11 \times 6 = 66$                |
| 5) $6 \times 6 = 36$                  | 25) $4 \times 6 = 24$                 |
| 6) $3 \times 6 = 18$                  | 26) $6 \times 9 = 54$                 |
| 7) $6 \times 8 = 48$                  | 27) $6 \times 6 = 36$                 |
| 8) $7 \times 6 = 42$                  | 28) $8 \times 6 = 48$                 |
| 9) $6 \times 5 = 30$                  | 29) $12 \times 6 = 72$                |
| 10) $6 \times 9 = 54$                 | 30) $6 \times 7 = 42$                 |
| 11) $12 \times 6 = 72$                | 31) $0 \times 6 = 0$                  |
| 12) $6 \times 3 = 18$                 | 32) $6 \times 10 = 60$                |
| 13) $8 \times 6 = 48$                 | 33) $6 \times 6 = 36$                 |
| 14) $6 \times 4 = 24$                 | 34) $6 \times 8 = 48$                 |
| 15) $9 \times 6 = 54$                 | 35) $9 \times 6 = 54$                 |
| 16) $6 \times 10 = \underline{\quad}$ | 36) $6 \times \underline{\quad} = 12$ |
| 17) $6 \times 1 = \underline{\quad}$  | 37) $6 \times \underline{\quad} = 72$ |
| 18) $11 \times 6 = \underline{\quad}$ | 38) $\underline{\quad} \times 6 = 18$ |
| 19) $0 \times 6 = \underline{\quad}$  | 39) $6 \times \underline{\quad} = 66$ |
| 20) $6 \times 12 = \underline{\quad}$ | 40) $\underline{\quad} \times 6 = 60$ |

Random Order comment Random text is "Times table disconnected in random order" spreadsheets multiply by 1, 2, 3, 4, 5, 6, 7, 9, 10, 11 and 12 comments Times Table "2-12 spreadsheets" 1, 2, 4, 6, 7, 8, 8, 9, 9, 9, 10, 10, 10 spreadsheets 12,13,14,15,16,17,18,19 and 20 comments Random order is random text is random text is mixed time table randomly multiply by 1, 2, 3, 4, 5, 7, 8, 9, 10, The Times Multiplication Times Times Tables Worksheets are "2, 3, 4, 6, 7, 8, 9, 12, 13, 14, and 16-time tables" Elevening worksheets Comments The Times Worksheet multiplication times are "2, 3, 4, 6, 7, 8, 9, 10, 11, 12, 13, 15, 16, 17, 18, 19, 15, 16, 18, 20-fold table commentary Multiplication Times Times Tables Worksheet 2, 3, 4, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 and 20-fold Table comment "Times Table Worksheets" is "1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, 14, 16, 17, 18, 19, 15, 16, 17, 19 and 20's "Fifty Worksheets Random Order Comment" is "My Transplet" is "Times table disconnected in random order" multiplication sheets for 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 and 12 random order comment "Times table disconnected in random order- spreadsheets" is "multiply by 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 and 12 random order comments"Random Text" is "Times Table mixed in random order- spreadsheets" multiply by 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 and 12 on This page, students begin with a jump counting activity. Then complete a 5S mixed-up multiplication table. Afterwards ©, compare the products using the symbols, and =.3rd and 4a gradient the facts on the page, then color according to the key. The secret image is a happy one Whale! 3rd and 4th Gradesprint This file on a thickness of thick cards. Cut the penguin and the cursor strip. Stretch the strip with multiplication facts in the penguin. Read every fact and give the answer. 3 and 4 The fish, the flowers, the snails and the crayons. Use the "count of five" knowledge to help. It goes up to 451st through GradesSkip's 3rd degree with five seconds to 120. Write the answers on the Penguins'bodies. 1st through the 3rd gradesome balloons have no numbers. Follow the pattern and write the missing numbers on the empty balloons. 1ST through the 3rd degree Shopping for holidays: practice decimal 1 holiday shopping: practice decimal 1 This holiday season, use the work sheet, shopping for holidays: practice decimal 1, to help your fifth elementary add, subtract, and multiply decimal. These abilities of the real world will be useful because © planning their own gift- giving this holiday. Here is a graphical preview for all multiplication sheets. You can select several variables to customize these spreadsheets for your needs. Reproduction sheets are created randomly and will never repeat so as to have an infinite supply of quality reproducible sheets to use in class or home. Our reproducible worksheets are a great resource for children in nursery school, 1st grade, 2nd grade, 3rd grade, 4th grade and 5th grade. Click here for a detailed description of all sheets of reproduction work. Click on the image to run on that multiplication worksheet. Working sheets of the multiplication times for the worksheets of the lesson plans These worksheets of the multiplication times are colored and a great resource to teach children their table multiplication times. A complete set of free printable multiplication time tables from 1 to 12. These sheets of reproduction time sheets are suitable for asylum, the first The 2nd degree, the 3rd degree, the 4th degree and the 5th degree. Chart of tables of multiplication times These multiplication times Table graphs is a great resource to teach children their tables of multiplication times. The graph is sized based on the size of the multiplied number. This graph is great for a visual representation of times multiplication tables. This multiplication graph is appropriate for Kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade, and 5th grade. Multiplication time spreadsheets These multiplication time spreadsheets can be used with four different time table intervals ranging from 1 to 9 and up to 1 to 12. Numbers in the multiplication time table can be selected to be displayed in order or randomly mixed. Multiplication worksheets can be displayed completely to be used as a teaching example or completely hidden for students to be used as an exercise. These multiplication worksheets are great for testing your students' understanding of multiplication time tables. These multiplication worksheets are appropriate for Kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade, and 5th grade. Multiplication Time Tables Time Exercises Worksheets These multiplication time tables worksheets are used to test students' knowledge of time tables. A student should be able to solve all 20 problems correctly in 1 minute. You can choose which multiplication time table to use. These multiplication worksheets are appropriate for Kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade, and 5th grade. Advanced Multiplication Time Tables Exercises Worksheets These worksheets will generate exercises for multiple tables selected by the user. The user can select from 256 different multiplication problems from time tables ranging from 0 to 15. The user can also choose a 1 minute drill of 20, 3 minutes of 60 problems, or 5 minutes of 100 problems, or a custom drill with from 20 to 100 problems and times from 1 to 5 minutes. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, 3rd degree, 4th degree, and 5th degree. Multiplying times Tables Target Circles Sheets of work These sheets of work will generate nine times Tables drill holes as selected by the user. The user can choose between timetables ranging from 1 to 15, and the interval for the table from 0 to 12. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, and 3rd degree. Sheets on multiplication to a vertical cipher These sheets on multiplication to a cipher are configured for a vertical problem format. The numbers for each factor can be changed individually to generate different sets of multiplication sheets. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, 3rd degree, 4th degree, and 5th degree. Reproduction sheets for problems in the range from 0 to 12 in a vertical format. The numbers for each factor can be individually varied to generate different sets of multiplication problems. If you select number 5 in one group and all numbers from 0 to 12 in the other group, then you will produce a multiplication sheet that creates problems for tables five times. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, 3rd degree, 4th degree, and 5th degree. Sheets of work on multiple digits Vertical Format These sheets of work on multiplication can be configured for multipliers of 2, 3 or 4 digits and multipliers of 1, 2 or 3 digits. You can select between 12 and 25 multiplication problems to be displayed in the multiplication worksheets. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, 3rd degree, 4th degree, and 5th degree. Multiplying sheets with single or multiple digits Horizontal Format These sheets of work on multiplication can be configured horizontal single-digit or multiple-digit problems with 2 factors. You can select between 12 and 30 multiplication problems to display in the multiplication worksheets. These are the worksheets are suitable for Kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade and 5th grade. 1, 3, or 5 Minute Drill Multiplication Worksheets Number Range (0-12) A timed drill is a multiplication worksheet with all the multiplication problems on a page. A student should be able to properly work all the problems on the multiplication worksheets within the time allowed. These multiplication sheets are suitable for Kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade and 5th grade. Advanced Multiplication Drills Worksheets Vertical Format This worksheet will generate advanced multiplication exercises as selected by the user. User can select from 256 different multiplication problems from multiplication tables ranging from 0 to 15. The user can also choose a 20 minute drill, a 60 problem three minute drill, or a 100 problem 5 minute drill, or a custom drill with 20 to 100 problem intervals and 1 to 5 minute times. Format Multiplication of the Missing Factor of Horizontal Work These multiplication cards are a good introduction to algebra concepts. You can select various font types to replace the missing factor for multiplication worksheets. The problem formats are horizontal and responses range from 0 to 99. You can vary the number of multiplication problems on multiplication worksheets from 12 to 30. These multiplication sheets are suitable for Kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade and 5th grade. Different Missing Factor Formats Format Multiplication Worksheets Horizontal Format These multiplication tabs are great for building missing factor problems. You can select different formats for multiplication problems and the range of numbers to use. The problem formats are horizontal and you can select 12, 16, 20, 24 or 30 problems multiplication by working sheet. Decimal Number Multiplication Format Worksheets Vertical These multiplication cards can be configured for 1 or 2 digits to the right of the decimal place and up to 2 digits to the left of the decimal place. It is possible to vary the number of multiplication problems in the spreadsheets on multiplications from 12 to 25. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, 3rd degree, 4th degree, and 5th degree. Sheets of work on multiplying negative numbers Horizontal Format These sheets of work on multiplication can be configured for horizontal problems to one or more digits. Factors can be selected as positive, negative or mixed numbers for these multiplication sheets. It is possible to vary the number of multiplication problems in the spreadsheets on multiplications from 12 to 30. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, 3rd degree, 4th degree, and 5th degree. Multiple of ten Sheets of work on multiplication Vertical Format These sheets of work on multiplication can be configured for multipliers of 2, 3 or 4 digits multiplied by more than ten. It is possible to vary the number of multiplication problems in the spreadsheets on multiplications from 12 to 20. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, 3rd degree, 4th degree, and 5th degree. Multiply with powers of ten Sheets of work on multiplication Horizontal Format These sheets of work on multiplication can be configured for multipliers of 2, 3 or 4 digits multiplied by more than ten digits that you choose from a table. You can change the number of problems on your worksheet from 15 to 27. These spreadsheets are suitable for Kindergarten, 1st degree, 2nd degree, 3rd degree, 4th degree, and 5th degree. Sheets of work on multiplication Vertical format These sheets of work on multiplication can be configured for a maximum of three digits to the comma. The currency symbol can be selected between Dollar, Pound, Euro and Yen. You can vary the number of problems for each worksheet from 12, 16 or 20. These multiplication sheets are suitable for 1 ° grade, 2nd degree, 3rd degree, 4th grade and 5th degree. Learn multiplication with array worksheets These multiplication sheets use array to help teach multiplication and write multiplication equations. The student will be given an array and asked to write the numbers of rows and columns in the array, as well as a multiplication equation to describe the array. You can select the range of rows and columns used for arrays. These multiplication worksheets are suitable for the 3° degree, 4° degree and 5° degree. Commutative Property of Multiplication with Arroyos Worksheets These multiplication cards use arrays to help teach the switching proper proper and how to write multiplication equations. The student will be given an array and asked to write a multiplication equation and then using the switching proper proper, finding an equivalent multiplication equation. You can select the range of rows and columns used for arrays. These multiplication worksheets are suitable for the 3° degree, 4° degree and 5° degree. Advanced Multiplication Facts with Arrays Worksheets These multiplication cards use arrays to help teach you how to write multiplication and division equations. The student will be given an array and asked to write multiplication and division equations to describe the array using rows and columns as a guide. You can select the range of rows and columns used for arrays. These multiplication worksheets are suitable for the 3° degree, 4° degree and 5° degree. Draw and determine the work arrays These multiplication cards help teach multiplication by learning how to draw and determine the size of the arrays. The student will receive a description of an array and then asking to draw the array and determine the number of array. You can select the range of rows and columns used for arrays, as well as the description given to draw the array. These are the Worksheets are appropriate for 3rd degree, 4th degree and 5th degree. Work Array Problems Worksheet These multiplication worksheets help teach multiplication by learning how to draw and determine the size of the arrays based on a certain problem of words. The student will receive a word problem in which they have to draw an array and write a multiplication equation to describe and solve the problem of the word. You can select the range of rows and columns used for arrays. These multiplication worksheets are appropriate for 3rd degree, 4th degree and 5th degree. Multiplying worksheets at 99 - 2 factors These multiplication worksheets will produce 2 factor problems in a vertical format where you can select numbers from zero to 99 to be used in problems. Numbers for each factor can be individually varied to generate different groups of multiplication problems. You can select up to 30 multiplication problems per worksheet. These multiplication worksheets are appropriate for 3rd degree, 4th degree and 5th degree. Grade.
