Connecting your A/V Receiver using Line Level inputs

If your A/V receiver supports multi-channel line-level inputs, you can connect them directly to your audio card's Line Out jacks instead of the Optical S/PDIF Out jack as shown below.

Connect to Line Out 1 (Front L/R)

	Jack, Connector or Cable	Description
1.	Line Out 1 jack (Front L/R)	Connects to the Front left and Front Right jacks on your A/V receiver, using a 3.5mm (1/8-inch) stereo-to-RCA cable (available separately).
2.	3.5mm (1/8-inch) stereo-to-RCA cable (available separately)	Connects your audio card and A/V receiver.
3.	Front Right jack	Connects to the Line Out 1 jack on your audio card, using a 3.5mm (1/8-inch) stereo-to-RCA cable (available separately).
4.	Front Left jack	Connects to the Line Out 1 jack on your audio card, using a 3.5mm (1/8-inch) stereo-to-RCA cable (available separately).

Connecting Speakers and Headphones 13

Order New Jabber-Im-Addon within the UCL (CUCM-USR-LIC) configuration to request Im for the number of unified communication users not Cisco Manager. Service profile - Make sure the service profile configured for the IM and Presence service is selected. However, it is necessary to verify that the services listed in the following procedure are in a State started before proceeding with other distribution activities. To enable the presence of telephony, you need to associate each IM service and Presence Service enabled the user with a line aspect in Cisco Unified Communications Manager. "Jabber for Everyones" supports advanced Imm and optional service features that prolong the distribution of the baseline. Also, consult the appropriate Cisco Jabber client documentation for more specific information for your Jabber implementation. To view the latest guide, see: The functional configuration for Cisco Jabber End-User Content is available on Central Guide. "Jabber for all" supports the Interdomain Federation and the Intermediate Intradomain Federation. Content: Includes quick guide and articles for users to use the client, such as creating calls, chats, meetings. The "Jabber for Everyone" feature has set the following, the following activities are high-level activities that you need to complete to enable basic IM service features and presence in the network: set users to Cisco Unified Communications Manager. Available Customer Customer SKU customer customer new or updated customer of the IM and Presence service, version 11.5 (1), 12.0 (1) or 12.5 (1). Step 3 Do one of the following to retrieve a list of phones: in the allocation of the functionality finds the features in which the field, specify appropriate criteria Click Find. Purpose: Provide information about the Configuration of Cisco Unified Communications Manager. Figure 2. Public: Administrators. To view the last guide, see: Cloud and hybrid distributions for Cisco Jabber Audience: Administrators. If you distribute plus clusters, you must Peer reports for each IM service cluster and presence in the same domain. With "Jabber for all", Jabber IM client applications and IM service licenses and presence are available for Cisco Unified Communications Manager customers are not additional licensing costs. Refer to the appropriate client documentation for detailed instructions. Watch the "Cisco Jabber applications" chapter of local distribution for Cisco Jabber for installation instructions. Configure a presence gateway for Cisco Unified Communications Manager. Step 1 Configure the SIP trunk to Cisco Unified Communications Manager. IM service and presence - provides instant messaging functionality and presence. Note You can distribute "Jabber for all" in a mixed cluster in which projects some users with only instant messaging and availability and other users with instant messaging and availability along with audio features. Purpose: Describe the Cisco Jabber features. "Jabber for Everyones" supports the partitioned intradomain federation with the following: Microsoft Lync Microsoft Skype For Business Server (minimum IM and the service release service is 11.5 (1) SU2) For more information on the distribution of the intradomaine federation Partitioned, consult the partitioned intradomaine federation for IM and presence service on Cisco Unified Communications Manager. For more information on the size of a service cluster of IM and presence, refer to the Cisco sizing tool. The Cisco Jabber Web SDK allows you to integrate Cisco unified communication capabilities in Web applications. The following matrix lists the features that support "Jabber for all" for each customer. Content: configuration information. To integrate the IM functionality into an application The Cisco Ajax XMPP (CAXL) library is used. Existing customer of the IM service version and Presence 11.5 (1), 12.0 (1) or 12.5 (1). If you are distributing additional third-party XMPP clients, configure the IL and attendance service to allow contact searches from third-party XMPP clients. Step 5 Click Save. These guides apply to all Cisco Jabber clients. The following figure shows the basic feature set IM and presence and optional features that can be distributed with additional configuration for advanced IM, UC Rich presence, control of the desk phone and visual voicemail. If your environment does not already include the IM service and presence, you need to install the IM service software and presence that is included in the delivery of the unified communication software. Furthermore, employees who are existing Cisco Unity Connection users can take advantage of Cisco Jabber clients for visual voicemail. It is possible to distribute more clusters of Im services and presence services for large-scale implementations. To view the most recent guide, see: Parameters Reference Guide for Cisco Jabber Audience: Administrators. It also provides a range of presence states ("available", "AWAY", "" offline "," Do not disturb "and custom status). Content: When configuring Cisco Jabber there are other features that you can add. Cisco Jabber on Central Cisco Jabber Guide for Mobile on Central Guide The guides in this section are for products related to Cisco Jabber. Specify functional assignments for end users on Cisco Unified Communications Manager. Step 5 in the Description field, enter a description. Note Jabber Note For all it is also supported in centralized implementations of the IM service and Presence. Step 4 Choose the device name appropriate from the list. You must create separate service profiles for users who only have instant messaging capabilities and availability. Refer to the configuration sections of the end user of the system configuration guide for Unified Communications Manager For information on configuring access to the Cisco Unified Communications Manager Directory Configuration Directory. Core im and Presence also enables the multi-device that allows a user to access more Cisco Cisco The devices in â €
