In this blog post, I want to share with you as I spent CISM (Certified Information Security Manager) from the first time, my study materials and strategy, the exam experience and some suggestions that helps me pass the exam. It's just the perfect time to get a security certification. Not only are they very requested on the market, but because according to Gartner, the unemployment rate for computer security professionals is zero. This means that there are more qualified candidate jobs. I personally invested a lot of time and effort in taking both CISM and CISSP certifications, because they are the most appreciated certifications for computer security leaders and professionals. However, it is not so easy and certifications as you need to invest a lot of time and money during the process. Brief security introduction Certifications If you are trying to enter the world of security and become a security professional or manager, then you will most likely know that there are several security institutions that provides security certifications that are recognized globally. There are independent non-profit organizations and not as: many people start with CISSP certification from (ISC) A² before going after other security certifications as CISSP is like the de-facto standard that covers almost all aspects of security Information, and is a request certifications if you are going to work in many security positions, including government positions. But it doesn't make the difference as order you get them, so you can take CISM and then go for CISSP. From my experience, I took the Cisp March 2019 certification before taking Cism certification in July from the same year. There are many common themes between the two that makes it easy for me to read and understand the CISM material. Things like risk management, business continuity, disaster recovery and governance are all common topics between both certifications. I felt like I already know 25% of the CISM material that makes it easier for me to read the CISM material. Isaca Isaca is a non-profit non-profit, independent, global association, which was previously known as the Information Systems Audit and Control Association. Today, Isaca serves 140,000 professionals in 180 countries. Isaca is well known of its framework of Governance Cobit and many information certifications such as: from the above four certifications, CISA and CISM are the most popular, and each of these target certifications different professional role. CISM is targeted for information responsible for information, while CISA is for reviewers. Here, in fact, it's a great 90 minute youtube video that talks about both and how to get a higher score through understanding certification requirements and questions. Who should take CISM? Unlike CISSP that can be an interesting choice for many professionals in different specialties, CSIM is targeted for further specific roles. The initiative is aimed at those who manage the security teams of company information and we see that you have an all-round knowledge of technical competence and understanding business goals throughout data security, and please attention from Business goals starts. It is not enough that we know the technical part of the story, but you must recognize that part of your role as information manager of the information is to understand the business goal of your organization, and therefore align these goals with the objectives The security program is about to carry out, and then how answer would be answered in the different situations during your day's work per day from a mentality manager. If you are a ciso in the Company, then this is one of the reasons why the intake of this exam helps to progress your career. Because, as a ciso, you want to create a security program and have risk management as part of it, define the security strategy, present business cases to management, and then report to senior management. All these topics are treated in great details in this this While many IT technical professionals may be interested in Cisp, they may not be interested in all cisma as it is a managerial level certification. The CISM exam domains unlike the 8 CISSP domains, CISM have only four domains: information on the safety of government information such as detecting and managing a security security programming accident as you can see from the four covered domains In the examination of cismo, those are such a security security manager would need to learn to advance his career. In the domain of information security governance, the goal is for you to know how the information strategy of information should be aligned with organizational goals and objectives and test your ability to develop and supervise a framework of information security governance To drive activities that support the information security strategy. While in the management domain of management information, it closes how to manage the risk at an acceptable level in accordance with the appetite for organizational risk, facilitating the achievement of achievement of the objectives and organizational goals. This requires to classify the information resources to ensure measures adopted to protect activities are proportional to their business value. In the development and management of the domain of the information security program, the possibility of developing and maintaining a security program of the information that identifies, manages and protects the resources of the organization aligning with the company objectives is obtained. And finally, in the domain of the management of information security accidents, we learn to plan, establish and manage the detection, investigation, response and recovery of information security accidents in order to minimize the company impact. Here is the official document of Isaca who speaks of the CISM certification. My study materials I brought my CISSP exam to March and then started preparing the shape of my Cisma exam. I used two main sources of study materials: Firstly, the guide for guidance exams for examining the Security manager manager operator is A ç à.→ A ç à.→ "that you can get from Amazon Here. Reading this book is easy for any security professional and has 500 pages, which is the half of the pages needed to read about the guide to the preparation of the Cybex Cisp exam. The other thing I did is to participate To the series of CISM training videos on Pluriansight. The course contains five sub-roues that direct the domains of four CISM and is a high quality training that helps you understand the key concepts and the way in which the security manager It should think in different situations. Of course it is possible to register for free and get 30 days of free access to all the Pluralsight courses that is fantastic. Make sure you plan the way a head in time I imagine That you can take the examination of cismo only during different periods of time throughout the year. It took me a month that is preparing for the exam, since I have a good experience working in two of the Domains of the CISM and I recently approved the CISSP exam. During this month, I dedicated three hours every day to study, excluding weekends. I planned a study strategy in which I read a chapter in the book, then I'm going to look at the pluralsight course related to that chapter. Mainly, each chapter of the book is mapped to one of the domains and each course of Pluralsight is mapped on a domain, which makes my life easier. After reading the whole book once and looking at the relative Pluralsight courses, I have A week practicing and answering the questions of the exam. The exam is difficult, well, at least it requires a lot of attention and these questions are complicated. Sometimes I feel 100% sure that both (a) and (b) are correct answers, but I know that I just have to choose one. You really want to answer questions with the mentality of a security manager and always keep in mind that your task is to align your safety strategy and the objectives of business goals. Of course, after passing the exam, which I did from the first time, wait a couple of days and receive a detailed report of how well you performed in each of the four CISM CISM Subsequently, to obtain certification, you need to start the application process for CISM certification, which you can find more details about the right here. Find out more? I have published more How to become Microsoft MVP a My Journey A ç. I also have a series of blogs about how I passed the CISSP exam, which I highly recommend you look like I share my personal experience on preparation and to take the exam, along with detailed information on the new CISSP exam format (CAT). Related here is the Firebrand Training revision section. Since 2001 we have trained exactly 105,949 students and asked everyone to review our accelerated learning. Currently, 96.66% said Firebrand exceeded their expectations. Read the comments from the last accelerated courses below or visit Firebrand Stories for written interviews and videos of our students. "My experience with Firebrand was extremely positive. He was supported for the whole course. Our instructor instilled a sense of trust and took us immediately to the hearing of the subject immediately and in all. I highly recommend this." Jima O'Hagan. (2021/10/08 (Tuesday) at 13/8/2021 (Friday)) "really informed and experienced instructor who led the course with exceptional delivery and humor! Will 100% recommend!" Rachael A. Knot. (2021/10/08 (Tuesday) at 13/8/2021 (Friday)) "The instructor is very competent in his work, his concepts helps put things in perspective, better training I've ever had . I can also remove useful knowledge that will help me in my career. " TM, FCA. (2021/10/08 (Tuesday) at 13/8/2021 (Friday)) "Trainer was amazing. The patient, practical, feet on the ground. He made me feel like he could actually pass." Beatrice, Belgrave-Jones. (2021/10/08 (Tuesday) as 13/8/2021 (Friday)) "Impressive approach to teaching from the instructor. With regard to content real examples and anecdotes really helped to consolidate learning objectives. Not being in Reality was involved in these thematic areas in the day day, I thought this would have been a bit of a routine job, I think it would be if someone else different from that instructor the day was teaching me. Refreshing, open and honest ". Hollieã, Mowatt, NCC. (2021/10/08 (Tuesday) at 13/8/2021 (Friday)) (Friday))
