MSRP: \$900.00 You Save: \$450.00 (50%) Brand: BADGER METER Condition: Used SKU: SD1586 Model: PC100 MPN: 59020-014 Country of Manufacture: United States Manufacturer: BADGER METER INC. Shipping: \$16.50 Shipping: \$5.00 ght: 2.50 Simple Installation. Easy to use. Facility of use with Ruggedness in a © keyboard rich for its application with robust support, keyboard and relay © adequate mechanics Clear the operator's information: all relevant data can be monitored on a single view in a user friendly installation with quality plugging and play terminals; Suitable for applications AC and DC (Pattern) A wide range of inputs, services and functions for broad compliance in many applications Showing units in {Text Label} Switches to {switchToText}} 5.67@NSAID. 2.83 144.66.72.100.5.67 NOVOS 2.83 NOVOS 4.33 in 144.66)72.00. Transparent high intensity node and alphanumeric LCD © rich, high-intensity, transreflective ultraviolet in a mother © rich and alfanum © rich LCD, 85 with resistance to UV-855V AC. Maximum energy consumption. 15 Watt NOVOS 4.33 in 144.66)72.00. Transparent high intensity node and alphanumeric LCD © rich, high-intensity, transreflective ultraviolet in a mother © rich and alfanum © rich LCD, 85 with resistance to UV-855V AC. Maximum energy consumption. 15 Watt 152Bae124; 24V DC +10%. Maximum energy consumption. 15 Watt Building Design, HVAC&Plumbing Flow instrumentation solutions are a crucial aspect of building, building and operating apartments, hospitals, schools, factories and other facilities. From HVAC and soil management to © plumbing and water services, our accountants are specifically designed to provide solutions that are accurate and faithful, even in the most challenging conditions. View Production Solutions Research Concrete&Consolidation Concrete Products by Badger Meter are used to accurately measure and control the amount of water and water additives used in concrete production. Our products can be found in thousands of ready and concrete blending plants and are built to meet the requirements of the most stringent concrete applications. Wyco, a division of the Badger Meter o, has led to the development of innovative tools to require concrete consolidation applications for more than 90 years. With the introduction of our first oscillator-powered flexible axle vibrator, the development of the only patented square-headed vibrator design of the industry and the launch of our vibration engine © Three Sure Speed is © Constant speed, Wyco has led the way in innovative and durable concrete consolidation tools. See Solutions In the oil and gas industry, the flow of fluids and gases must be measured during each stage of exploration, production and transport. These applications require the highest accuracy and reliability of the oil and gas a s meter, as well as long-term stability and a low cost of ownership. The badger meter offers one of the largest portfolios of products for use in upstream operations covering offshore activities on land, including population testing, increased oil recovery, fractionation, Conclusion and separation to recover and prepare crude oil and natural oils. To succeed in a competitive market, manufacturers must deliver the right product on time, every time, as well as capitalize on the opportunities for new products, maximizing simultaneously the increase and reducing production costs. These manufacturing and manufacturing industries around the world depend on accurate meters and flow meters of control technology. The flow meters of the badger meter produce consistently reliable performance to ensure adequate blending, cost transfer and signal transmission, as well as compliance with the standard requirements of the international industry. Flow gauges and exceptionally durable control products help keep production in operation. View Solutions You're Reading a Free Preview Pages 8 to 18 are not shown in this preview. Often, they will ask to get involved and plan our help, plant expansions, product improvements, brother changes or many o f the other contingencies that can occur in all the rapidly changing markets. They depend on Floweigh because they know that due to our many years of in so many different industries, there are very few applications that we haven't dealt with in the past. The flow values through © Ice or liquid elements can be measured based on volume, speed or mass and Floweigh has the ability to determine the type of measurement and control instrumentation that best suits his particular situation. Below are some of the most common types of meters we work with:Positive Differential Pressure Differential Displacement Mass/Bulk TankCoriolis Mass (used with natural fluid) Perhaps the most important detail in the equation © the fact that after the initial search was done and the products were selected and installed. Floweigh will stay behind and serve all the items we sell. With our own hands © Services techniques and an extensive invention of replacement parts, younga assured yourself of continued operation and no problems. It's Joshua 160; After all... © said and done, that might be the most important fact to measure. Measure.
