You can get files from different sites like YouTube, Vimeo, Dailymotion, SoundCloud among many others.With Vidmate You can choose the quality of files download on most supported platforms, thus checking not only the volume of each file , but also the fidelity of MP3 and MP4 files.The app download files, and for video files allows video resolution to choose before starting the download. As soon as you access Vidmate you will find an interface very similar to that of youtube, with a series of cards that categorize files.The "In the foreground" tab lists the most searched files on the service; In addition, the "video" service displays and a "Music" tab, each of which lists with the largest number of popular searches.The visualization files highlighted in its interface are based on their position, which is, the public Brazilian is one who defined the artists and creators of content displayed on the main page of the service, but it is possible to change the position of other regions, if desired. Vidmate also allows you to perform your own content searches and will take you the best options available on the main media sites around the world. 1 / 5Vidmate is a video and audio downloader developed by UCWEB and published by Nemo Fish. With it, you can download videos from various video-sharing platforms. You can find videos on the app through its integrated catalog, the search engine or in-app suggestions. They will be easy to find as Vidmate organized videos with categories such as news, sports, comedy, education and entertainment. His user experience is also easy to use as they simply scroll left or right to view each category. Once you're ready for download, you can select which video resolution you want to watch it as the download of 144p, 240p, 360p or 720p, Download on vidmatethe built-in search engine is a remarkable function in Vidmate as it allows for Download clips and movies directly from video sharing services such as YouTube, Vimeo and Dailymotion. It is more ergonomic as it is not necessary to switch from two applications. There are two ways to search for videos on Vidmate: by category or through manual search. The first category you will see is a feature. The home page of the app is also simultaneously. You can scroll left from the homepage to view videos from other categories. Search for a specific video can be performed by entering the keyword or video title in the text box found in the highest area of the app. Relevant videos for your search will appear under the text box in the list module. If you select videos from trend pages or through the search, you can see videos from various sources or platforms. You can choose to play the video first or start the download process. The process starts with a pop-up window that appears on the screen. It allows you to download the video or extract your audio. Note that you can only choose one at a time. Here you will also be able to select the resolution of your video or the format of your audio. All videos can be downloaded in 144p but the resolution can reach up to 1080p. Audio, on the other hand, can be downloaded in MP3 or M4A format. Improve the Download SpeedA € Download HD videos on Vidmate can be a slow. You can increase download speed by changing the program settings. The user settings menu is on the homepage, under the me button in the lower right corner of the screen. Here, deactivate the fast download mode and the activity count download options to turn it on. Another way to increase download speed is to alternate download download Option to interrupt the app to include subtitles in your video. Direct video DANNATONATORS APP VIDMATE FOR WINDOWS is a useful program for users who often use your Windows computer and watch videos of various platforms.
