Alight motion pro apk 3.2.2 download

Alight motion apk is the free and premium mod application of the video edition app, that contains many feature such as multiple player graphics, vector image edit, visual effect along with the color correction, easy mp4 export, shadow effects etc. But the main draw back of the alight motion free apk is that, the video will be rendered with the water mark. Hence we suggest you to buy alight motion premium apk from play store. But the cost of the premium version is 2.99 USD. This is little bit costlier, hence our site provide the alight motion mod version and the mod version unlock the all premium effects for free. We have checked the mod application, which is secure and can be used for various devices. Alight Motion Mod Apk Feature: Multiple video and audio along with the layer Vector support Bitmap support Color correction with the different visual effects Easy blur with the custom water mark Set a project into the favorite position. How to install Alight Motion Apk: Download the alight motion apk from the above link and the browser warns the "unknown source". But install it anyway. Currently Our site offers Alight Motion Pro apk 3.7.1, 3.6.2, 3.2.1 No Watermark Download for free Be part of the movement! Alight Motion, is the first professional graphics application for your smartphone, offering you professional quality animation, animated graphics, visual effects, video editing and video composition. Characteristics: * Multiple layers of graphics, video and audio * Vector and bitmap support (edit vector graphics directly on your phone!) * Visual effects and color correction * Keyframe animation available for all parameters * Facilitating animation for a smoother movement: choose from the presets or create your own synchronization curves * Motion-based motion blur * Export MP4 video or GIF animation Supported Android {6.0 and UP} Supported Android Version:- Marshmallow (6.0 - 6.0.1) - Nougat (7.0 – 7.1.1) - Oreo (8.0-8.1) - Pie (9.0) I love this app, and would 100% recommend to anyone considering it, but lately I've been having some issues. I'm having problems with my cursor and elements. It's been happening for a while, but it's just now starting to get on my nerves. I have my "show cursor" settings on, and it was fine at first, but now it will stamp itself in place on my screen and stay there until I close out the app. It's hard for me to explain, but imagine having two cursors on your screen. There is one that is stuck in place, and the other one that is fine and showing your taps (like it should)Second, after the latest update, I've been having issues with my element's text. When you have an element that mainly consists of text, it will let you do a simple text edit when brought into a project. My issue is that when I add an element (with the simple text edit) into my project, make the changes I want, and exit out of the project, it doesn't save. When I go back in the project, the element text is set back to its default. It's hard for me to explain, but I hope that these things can be fixed soon!!!! Hello! We understand what you mean! We apologize for any inconvenience. Please contact support@alightcreative.com so we can assist you (if you get an auto-response, and it doesn't help with your issue, please be sure to reply to it so you get through to a human being). If possible, please include a screen recording showing the problem and a screenshot of the app version information from the "About" screen (when you first open the app, open the side menu, tap "About" to get this information). The more information you can provide, the more like we are to be able to help. Thank you for bringing this to our attention!
