In this hack, Hacker can make the wall invisible to them but not to the opponent. Hacker can see the Bullets, Supplies, Vehicles and even Enemies through the Walls or Smoke using these hack. Moreover, this hack does not make them able to hit an opponent through the wall.How Wall-Hack Works in PUBG?The Wall-hack is done by reducing the opacity of the wall item, like website CSS and HTML. Making the opacity of the wall to 0% will make the wall invisible to the enemy. Moreover, this does not require any server-side coding or hacking attack. This hack will be invisible for the spectating enemy as well as PUBG admins. Some players use 10-20% opacity which makes the walls dimmer.#3 PUBG No recoil Hack for iOS and AndroidWhat is NO-recoil hack?No recoil hack is a type of hack in which the recoil of the gun is absent. The hacker does not have any type of recoil while firing. So in this case, all the bullets will hit at the same place (if the target does not move). These increases the changes of getting two or more consecutive head-shots. In three or four head-shots of an AKM or M726 or m416 the opponent will get down. How No recoil hack does work?This is a type of hack which is done by entering the script in the game code. By editing the game code the initial recoil values of the weapon is reduced to 0% or 1% percent. Then the recoil or any gun like AKM or M726 which usually has high recoil, will not have any type of recoil.The Flying Car is the hack in which the player can fly the car in the Air.
