## Skyrim fortify blacksmith potion recipe

19 March 2016 deal made of the day: 28 May 2021
What I discovered:
potion fortify smithing skyrim you can have to read this on skyrim fortifying enchanting ingredients
potion recipe you should know this about fortify smithing
potion skyrim look at this on skyrim alchemy
forts the enchanting potion recipe no longer endless search:
skyrim potion of fortifying factories glitch because we need more potion fortifying skyrim
fabbrim general information on skyrim enchanting
potion recipe in:
skyrim: enchanting effects,
skyrim: alchemy effects
change condivid increases smithing skill.
0003eb1d -- (Alchemy)0007A102 -- (enchanting)
fortify smithing is a property of alchemic ingredients and enchanted clothing. It affects only the improvement of weapons and armor at grindstones and work benches, not the creation of these elements to a forge.
Alchemy[edit | edit source]
the following ingredients also contain this effect:
primary ingredient
secondary effect
tertiary effect
quaternary effect
blisterwort damage stem
frenzy
restore health
fortify smithing
glowing mushroom
resist shock
fortify destruction
fortify health
smithing
fortify health
sabre
cat tooth
restore stamina
fortify heavy armor
fortify smithing
smithing weakness to poison
sprigchanage
sapage
the following potions can be done, and are sold by apothecary traders. should be noted that when using a potion, the 30 second timer will beduring the manufacturing process itself.
Name
Effect
ID
Subject
Blacksmith Potion
For 30 seconds, weapon and weapon improvement is 20% better.
0003EB2E
Draught of the blacksmith
For 30 seconds, the improvement of the weapon and weapon is 30% better.
0003995D
Blacksmith Philter
For 30 seconds, the improvement of the weapon and weapon is 40% better.
00039962
Elixir of the blacksmith
For 30 seconds, the improvement of the weapon and the weapon is 50% better.
00039967
Incante [edit]
The spell of Fortify Smithing can be learned by finding one of the following elements and captivating:
Artifacts and unique objects using the effect include:
The following types of items can be enchanted with Fortify Smithing:
Trivia
Ring
Necklaces[edit]
Fortify smithing craft potions cannot affect armor or weapon improvement if perks were not placed in the factory. The advantages allow to improve armor and weapons beyond basic improvement. The percentage of a potion seems to affect only this difference. To get the maximum increase per cent for Fortify Smithing Potions of 174%, you must use four 41% enchanted armor pieces of Alchemy, and the Perk Shadows Looker from Sallow Regent Black Book. Then, for real manufacturing, you have to combine this potion with four 41% enchanted armor pieces of factories for maximum updating of objects factories (using only specific articles for blacksmiths). Using a workbench or grinding machine does not stop time, so to get the benefits of a potion, the whole improvement processactivation of the workbench or grinding machine for pressing the improvement button must be carried out within the duration of the potion (typically 30 seconds). This generally means that you will need more potons to improve more pieces of equipment.

Hello? I did a lot of research from many sources and it was a bit confused as much as the less real information I found, so I invested many hours finding the way to the stronger weapons (maximum damage). I don't use any business, it's cheating in my opinion. The part with the necrome has never been fixed by developers (while many other things have changed) and I think it is nothing false. I'll give you a little bit of step. You will eventually find optional information. Note that I did this with level 74 so I am trying to keep this guide as small in perk-wasting possible (without any loss!). For me, I've always leveled all the perk-trees. Feel free to share this Guide or turn it into a video. It'd be nice if I called me there, but it's okay if you don't.
Another note: This guide is based on Skyrim's complete edition (Dawnguard, Hearthfire andLet's start. Minimum of 22 free Perks [if they are not already invested in the following points], Level 70 Alchemy Level 80 Smithing 100 [At least 91, if you don't want to get a weapon out of the dragon plug] But they will be the strongest!) Highly recommended 80 level (100 because of the "Extra Effect" Perk!) You need more Unspoil helmets, Gauntlets, Necklages, Rings (random material, value/material is not important!) As to the following ingredients [see part 6 + 10 for details]
Blisterwort
Glowing Mushroom
Sabre
Cat Tooth
Spriggan Sap
Ancestor Moth
Wing
Blue Butterfly
Wing
Chaurus
Hunter Antennae
Hagraven Claw
Snowberries
Spawn Ash
Must-Have-Perks:
Restoration: Necroma
Alchemy: Alchemist 5/5 + Benefactor
Enchanting: 5/5 + Insightful
Enchanter
Smithing: Daedric
Smithing + Dragon
Smithing (best heavy armor: Daedric, stronger weapons: Dragon)
Process: Put the weapon(s)/Armor(s) of your trust by using a "Flower Force" (Important: Putting weapons does not need a potion or some enchanted gear! At this point, this does nothing at all!). The best / most powerful weapons are those of the Dragonbones/Dragonscales! The best heavy armor is the Daedric. Become a vampire. Goto a "incantating table". Enchants the following with "Fortify Alchemy":
Helmet
Braces
Necklage
Ring
Equip these and goto a "Alchemy Table" Put together 2 of the following articles (your choice) to create a "Fortify Enchanting Potion":
Moth
Wing
Blue Butterfly
Wing
Chaurus
Hunter Antennae
Hagraven Claw
Snowbers
Spawn Ash
Spriggan Sap
Mix the potion, go to a lovely table, drink and repeat this from part 4 until you have this product-stats:
Fortify Enchanting Poton: 38%
Fortify Alchemy
Helmet/Gauntlets/Necklage/Ring: 31%
Equip your 31% alchemy gear.
Craftsmanship as many as possible
"Fortifica le pozioni incantanti"! [Look at Part 6]
Craftsmanship as many as possible
"Fortify Smithing" Potions using 2 more of the following ingredients:
Blisterwort
Glowing Mushroom
Sabre
Cat Tooth
Spriggan Sap
Go to the "Enchanting Table" and drink one of the "Potions Enchanting Strong" [remember the term of potion]. Enchants the following articles with "Fortify Smithing":
Helmet
Braces
Neck Ring
Grab the weapon of your trust and look for a gray stone
Drink one of the Potions "Fortify Smithing" [remember the term of potion] and improve your weapon/arm! :)
Now you have the weapon as strong as possible, but do not forget: By improving the other Armor with incants like "Fortify One-Handed", etc. you can take out much more Damage! But the weapon itself is now at the highest possible level!
Enchanting the other equipment with the "Fortify Enchanting Potions".
Serious advice:
Heavy armor:
Armature of daedrica
light:
Dragon weapons:
Dragonbone
Sneaking:
Fortify Unarmed
Dresses
Enchanted Poton: 38%
Fortify Alchemy
Gear: 31%
Fortify Smithing
Potlon: 153%
Video: to cure from vampirism and return to normality
Go to Morthal and talk to the magician called Fallon. He will cure you, if you bring him a "Black Game Anime" (if you have a blank, the easiest way would be to launch a weapon, "Bound Bow" for example, and shoot a dead Human! This will capture his soul in the soul's gem).
I'm already healed!
Help! I want to go back to a vampire!
Easy, go to the "Castle Volkhar" and talk to "Serana." it'll help you.
Where can I find "Daedra Hearts"?
Go to Winterhold and talk to "Enthir" (he's somewhere in college). He'll sell you two.
After purchasing them, wait 2 days or safe the game and restart it, to fill its stock.
You can repeat it until you die.
What is Necromage-Perk for?
Improves spells on undead.
Now, if it turns into a vampire, it also turns into a dead person, so this point also counts on you.
Potions are also in the "Spells" category, which also improves them. :)
No one seems to be sure if this is a bug or if it is so wanted by developers. It doesn't seem to me that this is a planned feature at first, but it makes sense and also gives you a reason to play as a vampire.
Vampires are generally under power in Skyrim. Tell me about crafts and improvement!
Workbench: Improve
Armorstone
Grindstone: Improve
Tanning Rack
weapons: Turn skins into leather.
Turn the minerals into needles (2 hours = 1 swallowed)
Blacksmith's Forge: Craft weapons, armor, jewellery, construction materials
Table: For alchemy-potions (hohoho...srsly?)
Enchanting table: Gear
Equipment
